PROFESSIONAL SUMMARY

MCA graduate and Full-Stack Software Development Intern with hands-on experience designing and building full-stack web applications, AI-integrated tools, and payment-oriented platforms using Python, JavaScript, React.js, Node.js, Express.js, and SQL/NoSQL databases. **Delivered 5+ end-to-end projects**, including payment and merchant platforms built during a Software Development Internship at Surfboard Payments. Skilled in REST API design, database architecture, and integrating generative AI APIs into production-style applications.

TECHNICAL SKILLS

- **Languages:** Python, JavaScript, SQL, HTML, CSS
- **Frontend:** React.js, Responsive UI, Component-Based Architecture
- **Backend:** Node.js, Express.js, Flask, REST API design
- **Databases:** PostgreSQL, MySQL, Firebase, Oracle SQL, Supabase
- **AI / ML:** Generative AI API Integration, Pandas, NumPy, CNN, Transfer Learning, Predictive Modeling
- **Tools:** Git, GitHub, VS Code, Jupyter, Postman, Figma

EXPERIENCE

Software Development Intern — Surfboard Payments

May 2026 – Jul 2026

Chennai, Tamil Nadu

- Built and shipped full-stack features using React.js, Node.js, and Express.js across **16 core modules** of a payment-oriented product.
- Designed and implemented payment workflow logic, including order processing, refunds, receipts, and webhook handling.
- Collaborated within a 2-member engineering team using Git and GitHub for version control, code review, and sprint-based delivery.
- Used Figma for rapid UI prototyping and translated designs into responsive, production-ready front-end components

Data Science Intern — Edu Tantr

Apr 2025 – Jul 2025

Bengaluru

- Cleaned and preprocessed datasets using Python, Pandas, and NumPy, including feature engineering, encoding, scaling, and missing-value handling.
- Built and evaluated classification models to support data-driven decision-making.
- Used SQL to extract and transform structured data for analysis; built interactive Power BI dashboards for reporting.

SELECTED PROJECTS

ServiConnect — AI-Powered Service Marketplace [Live](#)

React.js · Node.js · Express.js · Firebase

- Designed a 16-page product blueprint and built a full-stack marketplace connecting customers with local service providers across **13 service categories**, targeting Tier 2/3 Indian cities.
- Built a multilingual AI-powered skill-verification layer for validating service-provider credentials using Gemini AI, Firebase, OpenStreetMap, and Vercel.

LiquiFlow — Post-Authorization Treasury Middleware [Live](#)

React/Vite/Tailwind · Node/Express · Firestore · Gemini AI

- Built a treasury-middleware simulation platform modeling **post-authorization payment flows**. Integrated Firebase Auth and Gemini AI to automate **Settlement and Refund**.
- Implemented Firebase Authentication and Firestore for user authentication and application data management.

SelfCook & Crop Disease Prediction (Academic)

Node.js/Puppeteer · Python/TensorFlow/CNN

- SelfCook: automated image-to-recipe pipeline (image recognition, Google Lens, Puppeteer).
- Crop Disease Predictor: MobileNetV2 CNN deployed via **Flask** for real-time classification with 85% Accuracy.

EDUCATION

Master of Computer Applications (MCA)

Jul 2024 – Apr 2026

Alagappa University, Karaikudi

Bachelor of Computer Applications (BCA)

Jun 2021 – Apr 2024

Alagappa Government Arts College, Karaikudi

CERTIFICATIONS

- TCS National Qualifier Test (NQT) — 79.20 Percentile
- Machine Learning with Real World Applications — TCS iON
- Data Analytics with Generative AI — Deloitte (Forage)
